

CONVEYORIZED CLEANING & DEGREASING MACHINE

The ConveyORIZED type Parts Washer works on pressurized spray cleaning techniques in which the cleaning process such as Washing, Rinsing & Hot air blowing will be done in a separate chamber through continuous process.

These machines are selected for achieving high level of output from the components. The uncleaned parts are loaded in one side & the cleaned components will be taken out from the unloading area & moved to further process.

ULTRAMAX HYDROJET PVT. LTD.

BASIC FEATURES OF THE MACHINE :

- All Wetted parts are constructed using Stainless Steel (SS 304)
- High Pressure wash pump
- Special 3D Nozzle arrangement
- Automatic Oil skimmer
- Gas Springs for Accessing the Cabinet Doors
- Operator panel with PLC Control & HMI Display
- Water Level Float Indicator (High Level & Low level)
- Electrical Immersion Heating for optimizing the Wash Tank temperature
- Tank Wall insulation
- Drain Ball valve for emptying of tank

OPTIONAL ACCESSORIES :

- Oil Separator Attachment
- Rinsing Process in separate chamber

CONVEYORIZED PARTS WASHER TECHNICAL DATA					
Machine Model No		SPCWM/400	SPCWM/600	SPCWM/400 2T	SPCWM/600 2T
Conveyor Width	mm	400	600	400	600
Loading Height	mm	900	950	900	950
Tank Volume	Ltrs	250	300	300 /200	450 /300
Pump Spraying Pressure	bar	3-4	4- 5	4-5	4-5
Pump flow Rate	l/min	80- 100	160- 180	200- 240	280- 300
Pump Motor	Kw	2.2	3.2	4	4
Blower Capacity	Kw	4	5.5	4	5.5
Water Heater Capacity	Kw	12	18	24	36
Conveyor Drive	Kw	0.18	0.25	0.25	0.25
Cleaning Temperature	°C	55 - 60	60 - 65	60 - 65	60 - 65
Voltage	V	230/415	230/415	230/415	230/415
Phase	Ph	3	3	3	3
